Board of Health Report.

In making this our first annual report we would respectfully say that it has been generally healthy throughout the town during the past year. There has not been any cases of small pox, typhus fever, membranous croup, scarlet fever, or typhoid fever. Diphtheria and measles have prevailed to some extent. The total number of cases of diphtheria reported in town during the year was 13,—of these two have proved fatal. The greatest care has been taken to prevent the spread of the disease, and the premises have been thoroughly fumigated and cleaned.

In compliance with the regulations of the State Board of Health, and to prevent the spread of contagious diseases, we have placed placards upon houses where the sick with those diseases were with instructions and warning to all who might observe and be benefited by them. In some cases we have met with opposition, which we believe to have been caused by misunderstanding the purpose, necessity and authority of the work. The State Board of Health is the highest medical and legal authority of the State in such matters, and it is the duty of local health officers to obey the instructions and enforce the regulations of the State officers. The result is known by the diminution of those diseases thus confined and restrained.

We thank those who have seconded our efforts to stay the spread of the dreadful disease, and invite the hearty co-operation of every one in our support in the future.

Respectfully submitted,

WM. W. HALL,	}	Board of Health of Unity.
